Mr. Wells is young in years but of the ripest experience in the field affairs of the Government. He is both a poblical economist and yightful financiar. He has made the revulue as team of the country his applical and yightful financiar. He has made the revulue as team of the country his applications to Congress in a series of teports which have challenged the admiration of bust mess men and thinkers, both in this country and in Europe. He possesses the confidence of capitalists in both hemispheres in a very high degree.
